Six Sigma emphasizes absolute quality improvement, beyond the traditional quality statistics and tools. The Six Sigma program is a proven methodology, which focuses on achieving drastically improved business results. When deployed professionally, for the selected business projects / areas / departments, Six Sigma shall prevent the defects prior to their occurrence, leading to huge monetary savings. That leads to competitive edge in the market and direct immediate profits enhancement. The market leading organizations of all sizes are cutting costs and boosting profits through improved productivity by adopting Six Sigma. Companies and organizations of all types i.e. Manufacturing, Financial, Health Care, Education, Hospitality, and Services Providers of all kinds and all sizes are adopting Six Sigma. Six Sigma delivers the positive results even if it is not implemented across the whole organization.
