Objectives:

At the end of the programme the delegates will:

- Understand the classification and hazards of chemicals
- Understand and be able to interpret the information on material data sheets
- Understand the precautions required when handling chemicals
- Understand the need for and use of personal protective equipment

Who should attend?

Suitable for all employees working with or handling chemicals or other hazardous substances or materials.

Course Outline:

This course has been designed to enable participants to understand the requirements for the safe handling and loading of chemicals.

- Introduction to the definition of hazardous materials and classification of chemicals.
- Hazards of handling chemicals and other harmful substances as well as the use of material safety data sheets.
- Precautions and the safe handling of hazardous materials including chemicals.
- Loading of hazardous material.
- Personal Safety.

WORKSHOP STYLE:

A mixture of short presentations, interactive discussion, individual exercises and group work. The emphasis throughout is on a practical approach using case material and examples.
