OBJECTIVES:

World-class logistics practices and systems are the means to simultaneously improve customer service, reduce operating expenses and minimize capital investments. The course addresses the changing and increasingly important role of logistics in business; performance measures and benchmarking procedures; world-class processes for customer service and order processing, inventory planning and management, purchasing procurement, supply chain integration, transportation and distribution, and warehousing; logistics information systems architectures and implementation strategies; and logistics organization design alternatives.

The main objective of the course is to teach the participants how to develop a comprehensive logistics strategy to support overall business objectives, and to enable them to:

1. Identify the products and services that can be best obtained externally;
2. Develop, evaluate and determine the best supplier, price and delivery for those products and services.
