This comprehensive conference provides you with an in-depth view of the extensive functionality contained within the Human Resources and Payroll applications. Besides learning the functionality, you will also learn tips and techniques that can help make an implementation successful, and you will gain a thorough understanding of the HR and Payroll applications and its capabilities.

The course covers the setup of the Payroll and Human Resources modules. It covers the processing of Payroll checks, and the everyday tracking of Human Resources. It also covers the Applicant functionality found in Human Resources so you can track the necessary information to hire quality employees.

Course objectives:

- Effectively use the Payroll Setup windows to customize the application to your organizational needs
- Understand the available global setups that are available in Human Resources
- Set up the Human Resources Benefit and Deduction system and its integration to Payroll
- Set up Attendance including time codes and accruals and how they are attached to employees
- Create pay codes, deduction codes, benefit codes, taxes and other employee related items used to calculate Payroll checks
- Assign methods to calculate vacation and sick time for employees
- Process, generate and void Payroll checks for employees
