Traditionally, lenders have faced credit risk in the form of default by borrowers. To this date, credit risk remains major concern for lenders worldwide. The more they know about the creditworthiness of a potential borrower, the greater the chance they can maximize profits, increase market share, minimize risk, and reduce the financial provision that must be made for bad debt. This product provides fundamental understanding of the credit risk analysis process and discusses in detail, various aspects of financial statement analysis, including ratio and cash flow analysis, among others to help in making better credit-related decisions. It also looks at various non-financial factors such as Business Plan, Industry/Sector, Top Management, etc. that could affect the creditworthiness.

### Objectives:

After completing this course you will be conversant with:

- Apply credit analysis to assess borrowers in real cases
- Perform ratio analysis and cash flow analysis
- Structure loan products in a competitive way
- Identify and work-out problem loans

### Who should attend?

Every professional involved in the global financial services industry (as a provider, user, regulator or advisor of product/services, marketplace/exchange) would benefit from KESDEE's innovative solutions:
